

Pager Messaging

Robust and reliable messaging via an API or web interface.

Directly connect your application by using one of our simple APIs or login via our web messenger interface to send your pager and SMS messages. We handle the connectivity to the Spark paging network and carrier networks. From the web dashboard you can view detailed reporting about all the messages sent.

Features & benefits

- ▶ High-volume throughput
- ▶ Supports long messages
- ▶ Web dashboard with detailed message reports
- ▶ Dedicated connection to the Paging Network
- ▶ Range of coverage
- ▶ Use the same interface and connections for sending both SMS and Paging messages.

HTTP/S

A popular choice for those wanting to integrate SMS into their app using simple GET.

SOAP

The original gateway using its own web service definition language.

REST

Feature rich with a range of developer libraries and allows you single mobile or broadcast to many.

WEB2SMS

Easily upload your audience data from any web browser and send messages.
